**TECHNICAL BULLETIN #41**

Sound Attenuation Fencing

May 20, 2005

As a result of the 2005 Standard Development Agreement negotiations with Calgary Roads, UDI - Calgary wishes to advise its members that effective immediately there is no longer a requirement to submit a Noise Analysis Report prior to Tentative Plan Approval. Approval of the Noise Analysis Report will now be required prior to Final Approval of the Construction Drawings.

It should be noted that berming will not be permitted within public boulevards adjacent to the sound fence and as such, additional lands may be required to allow berming on private property. These areas should be identified at the outline plan stage so that they are subsequently accounted for on the tentative plan. If additional land has not been allotted for berming then a higher wall may be required.

If you have any questions please do not hesitate to contact the UDI – Calgary office.

For your convenience all UDI – Calgary bulletins are posted on our website at [www.udicalgary.com](http://www.udicalgary.com).
