TECHNICAL BULLETIN #54b

Decorative Streetlighting – Incremental Costs for Maintenance and Energy
New Residential Subdivision Development

July 21, 2006

Further to our Technical Bulletin #54 we would like to provide clarification to our members who are not aware how to calculate Roadnet meters for the incremental operating and maintenance cost for Decorative Streetlighting.

Roadnet is the City of Calgary's system for measuring length of roads. For the purpose of calculating the incremental cost for energy and maintenance for decorative streetlighting, the unit cost for each type of decorative streetlighting will be applied to the length of the centerline of the roads in each subdivision phase.

If you have any questions please do not hesitate to contact the UDI – Calgary office, or Roads at the City of Calgary.

For your convenience all UDI – Calgary bulletins are posted on our website at www.udicalgary.com.
