TECHNICAL BULLETIN #60

2007 Standard Subdivision Streetlighting Rate

December 11, 2006

UDI – Calgary has been advised that there will be a 13% increase to the linear metre rate for 2007 by ENMAX Power Services Corporation, effective January 1, 2007. The existing rate will increase from \$99.88 to \$113.00 per linear meter. ENMAX did not increase their rates for 2006 and honored the 2005 rates despite the increase in their costs.

The costs for steel and shipping of streetlight poles are primarily responsible for 10.75% of the total increase, while labour rates continue to rise and make up 2.16% (pro-rated) of the increase. The other component is in the area of additional requirements dictated by Calgary Roads to provide supplemental as-built data for the City's geo-database. Although this component is small and makes up .19% of the increase, additional drafting resources have thus been added.

Any cost estimates Enmax has sent out to developers and that have been accepted along with the partial payment will be honoured at the \$99.88 / meter rate. Any quotes that have been provided before or after December 15, 2006 that have not been followed up on within 30 days of receipt are subject to the new rate.

If you have any questions please do not hesitate to contact ENMAX Power Services Corporation directly.

For your convenience all UDI – Calgary bulletins are posted on our website at www.udicalgary.com.
